Work History

SOFTWARE ENGINEER | OENSYS CAPITAL (SRI LANKA)

05/2019 – 07/2022

Worked on making new features and improvements to the healthcare project in the full stack spectrum with React UI components, Symfony APIs, and React Native. also played a mid-senior developer role in mentoring junior developers.

- Performed full-stack development and improvements to the healthcare web application
- Conducted effective peer code reviews with a small team of developers to keep the code base up to industry standards

– Contributed to mobile application development by
   implementing offline booking functionality
 – Provided technical guidance to new hires

ASSOCIATE SOFTWARE ENGINEER | OMOBIO (SRI LANKA)

02/2017 – 03/2019

Worked on several telecommunication projects with challenging
requirements and deadlines ranging from new developments to
bug fixes of legacy code. Produced high-quality output while
working both at the company's headquarters and on a client
site.

 – Built UI components and integrated APIs for consuming
   data from third-party databases
 – Worked using agile practices while being outsourced at
   the client site
 – Implemented a complete reporting module with an improved
   search feature, reducing the maximum search time for
   older records
 – Designed an entire change request to update the real-time
   status of file uploading on legacy code
 – Developed a self-registration API to streamline user
   registrations for the administrative portal
 – Performed successful live deployments on a regular basis

WEB DEVELOPER | AIM SOLUTIONS (SRI LANKA)

07/2016 - 12/2016

Designed and developed an e-commerce website with an
integrated inventory system. My systems provided interfaces
for customers and store personnel to browse and manage orders.

 – Developed a responsive e-commerce website as the
   company's flagship product with payment gateway
   integration
 – Created a POS interface for the e-commerce website to be
   used at the client store
 – Maintained complete ownership of projects from
   requirement gathering to successful delivery as a solo
   developer
 – Trained customers to use the system's functionalities
